Similar in content to other leading books, but with more compact presentation style and a lot of extra details. May have information in excess to what is needed for Step 1. Excellent illustrations. Ideal as a supplement material, or as coursework during first year of medical school.</p>	\$82 Review

Includes excellent high-yield charts and tables, but lacks some figures from Costanzo's <i>Physiology</i>. Features high-quality practice questions with explanations in each chapter along with a clinically oriented final exam. An excellent reference during times of focused Step 1 studying, but best if started early in combination with coursework. B	<p><i>Netter's Physiology Flash Cards</i> MULRONEY Elsevier, 2016, 450 pages, ISBN 9780323359542</p> <p>Flash cards contain a high-quality illustration on one side with question and commentary on the other.
